# NAVEEN KUMAR V B

Software Developer

naveensends@gmail.com 9884295853 Chennai,India Male

13 Oct 1999 github.com/naveenkumar101999 linkedin.com/in/naveenkumarvb

## PROFILE

**Software Developer** specializing in building modern web and application solutions using **Angular, HTML, CSS, JavaScript, jQuery, ASP.NET, and .NET Core**. Experienced in developing responsive applications with **Web Forms and MVC**, and integrating systems through **RESTful Web APIs**. Strong hands-on experience with **SAP Business One (SAP B1)**, leveraging **Service Layer and API Gateways**, and building **Windows Services** for background processing and automation. Proficient in **SAP HANA DB, SQL Server, and MySQL**, with a focus on secure, scalable, and high-performance application development.

## PROFESSIONAL EXPERIENCE

**Developer - Web App** June 2026 – Present | Chennai

*SANeForce*

- Developed and maintained **pharma product solutions** using **ASP.NET , .NET MVC, .NET Web Forms, C#, and ASPX**, delivering scalable and reliable business applications.
- Analysed business and product requirements and worked on the **complete development lifecycle of modules**, from requirement understanding and implementation to testing and delivery.
- Built and consumed **Web APIs** for seamless integration between frontend, backend, and other application components.
- Designed and developed responsive user interfaces using **ASP.NET Web Forms, JavaScript, jQuery, HTML, CSS, and Bootstrap**.
- Designed and managed **SQL Server databases**, including table creation, data management, and database-level implementation required for product modules.
- Developed and optimized **Stored Procedures (SPs), Triggers, and SQL Jobs/Scheduling** to support business logic, automation, and efficient data processing.
- Implemented and maintained **C#** backend logic and application functionalities across different product modules.
- Used **Git repositories** for source code management, version control, collaboration, and maintaining application code across development activities.
- Troubleshot, tested, and resolved application and database issues to ensure the **performance, reliability, and stability** of the product.

**Associate Web Developer** December 2024 – May 2026

*Strong Business Solutions Pvt Ltd*

- Developed and maintained ERP solutions using **ASP.NET** and **.NET Core**, delivering scalable and secure business applications.
- Built and consumed RESTful Web APIs for seamless integration between frontend, backend, and third-party systems.
- Designed responsive user interfaces using ASP.NET **Web Forms, JavaScript, jQuery, React.js, HTML, CSS, and Bootstrap**.

- Implemented **Windows Services** for background processing, scheduled jobs, and automation.
- Integrated **payment gateways** and implemented authentication, authorization, and encryption for secure transactions.
- Developed features including **bulk uploads, SMS notifications, and escalation** workflows to support business processes.
- Customized and integrated **SAP Business One (SAP B1)** solutions with **SAP HANA DB** and **SQL Server**.
- Tested and validated APIs using **Postman** and managed source code with **Bitbucket**.
- Deployed and maintained applications using **IIS**, ensuring performance and reliability.

**Software Engineer** January 2023 – June 2024

*KriyaTec IT Systems Pvt Ltd*

- Developed responsive and scalable front-end applications using **Angular**, creating reusable components and modular architectures.
- Built rich, data-driven UIs using **Bootstrap, PrimeNG, Angular Material, Tailwind CSS, HTML, CSS, JavaScript, and TypeScript**.
- Implemented advanced **data grids and tables using AG Grid and Angular data tables** for efficient data visualization.
- Developed dynamic and configurable forms using **Formly Forms**, improving form reuse and maintainability.
- Performed **API calling and data handling using Angular services and HttpClient**, ensuring efficient frontend–backend communication.
- Integrated Angular applications with **.NET Web APIs**, enabling secure and reliable end-to-end data flow.
- Implemented **authentication, authorization, and encryption** mechanisms to secure applications and user data.
- Developed **cross-platform mobile applications using Flutter**, leveraging stateless and stateful widgets.
- Managed source code using **Bitbucket and GitHub**, and collaborated on UI/UX design using **Figma and Miro**.

## SKILLS

**Languages** — HTML, CSS, Bootstrap, JavaScript, TypeScript, Dart,C#, Java, MongoDB, MySQL, SAP HANA

**Developer Tools** — VS Code, Visual Studio, Eclipse, Android Studio, Postman, Git, Bitbucket

**Technologies/Frameworks** — Angular, React.js, Angular Material, Node, Flutter, Linux, SAP Service Layer, API Gateway, ASP.NET, .NET CORE, Windows Services, MVC, Web Forms and Web API

## EDUCATION

**MCA** 2020 – 2022 | Chennai
*Madras University*

**BCA** 2017 – 2020 | Chennai
*Patrician College of Arts and Science*

## PROJECTS

**Direct Business** 2024
*Simple Responsive Mobile Application*
*(Business Directory)*
Technologies used: Flutter
- Designed and developed an intuitive, accessible front-end UI for the Direct Business mobile app with responsive layouts.
- Collaborated closely with the development team to ensure seamless integration between front-end design and back-end functionality.
- Focused on delivering a visually appealing, user-friendly interface to enhance overall app usability and experience.

**NK Apparels** 2022
*Simple responsive E-commerce website*
Technologies used: HTML | CSS | JavaScript
- Developed and implemented a responsive e-commerce website using HTML, CSS, and JavaScript with mobile-first design principles.
- Created a user-friendly interface optimized for seamless navigation and enhanced user experience.
- Curated and integrated a diverse range of product categories from global suppliers, ensuring a comprehensive shopping experience.

**NIGHT LAMP AND MORNING ALARM** 2020
*Acadamic Project*
The project Automatic Night Lamp with Morning Alarm System makes use of a super bright LED as the night lamp. It is powered by a standard 0-9 V transformer. Light-dependent resistors or LDR's are used for sensing the
darkness in the room.
